Title: 'Medieval Fortifications in Cilicia'

In my presentation 'Medieval Fortifications in Cilicia' I will offer the audience a better insight in the origins, development and spatial distribution of fortified sites from the time of the Armenian Kingdom (1198-1375). Despite the abundance of archaeological remains, the Armenian heritage had previously not been closely studied. However, through the examination of known and newly identified castles, this work has now increased the number of sites and features associated with the Armenian Kingdom.
